

Champlain Parkway Project

Burlington, VT

Tuesday, August 25, 2020

The NEPA comment period for the Limited Scope Draft Supplemental Environmental Impact Statement (LS DSEIS) closed on Monday, August 24, 2020.

Now that the NEPA comment period has closed, the team is developing a Limited Scope Final Supplemental Environmental Impact Statement (LS FSEIS). This document will include written responses to all comments received during the comment period. The LS FSEIS will be submitted to the Federal Highway Administration (FHWA) for review.

Based on the current project schedule, it is anticipated that the LS FSEIS will be issued in October 2020. When the LS FSEIS is released, it will be available on the project website.

FHWA could either request changes to the project based on the Limited Scope of this Supplemental Environmental Impact Statement (SEIS) or issue a Record of Decision (ROD). Based on the current project schedule, a ROD could be issued by the end of 2020.
