

## City Council Approves Construction Contract Award for the Champlain Parkway Project

**BURLINGTON** – On Monday, April 25, 2022, the Weinberger administration and the City of Burlington Department of Public Works announced that the City Council has approved the recommendation to award the construction contract, for the Champlain Parkway Project. [See the full press release here.](#)

The City, with the support of its State and Federal partners will be issuing a Notice of Award. The Notice of Award is a notice for the contractor to begin the process of assembling all documentation necessary to execute a contract. More information will be published on [www.champlainparkway.com](http://www.champlainparkway.com) as it becomes available.

This initial contract involves upgrades to Lakeside Avenue and the section of Pine Street between Lakeside Avenue and Kilburn Street, as well as the construction of the Champlain Parkway from Home Avenue to Lakeside Avenue. Construction is anticipated to begin in July of this year and be completed in 2024. More specific information on the timing and location of upcoming work activities will be shared as those details are developed.

### Champlain Parkway Segment Home Avenue to Lakeside Avenue

### Champlain Parkway Pine Street Segment from Lakeside Avenue to Kilburn Street

With consideration of the Shelburne Street Roundabout Project, currently under construction at the intersection of Shelburne Street/South Willard Street/Ledge Road/Locust Street, construction on Pine Street as part of the Champlain Parkway Project will be limited during 2022 to avoid any additional conflicts with Pine Street traffic. Additional construction sequencing and coordination with other projects in the South End can be viewed in the [Burlington South End Project Sequence Plan](#).
