Champlain
Parkway
Project

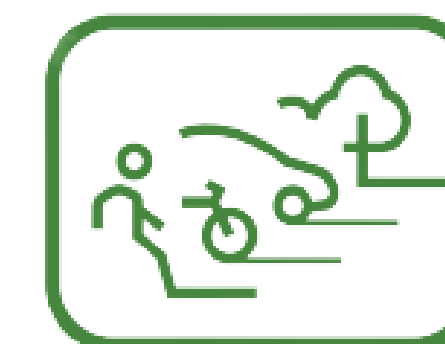

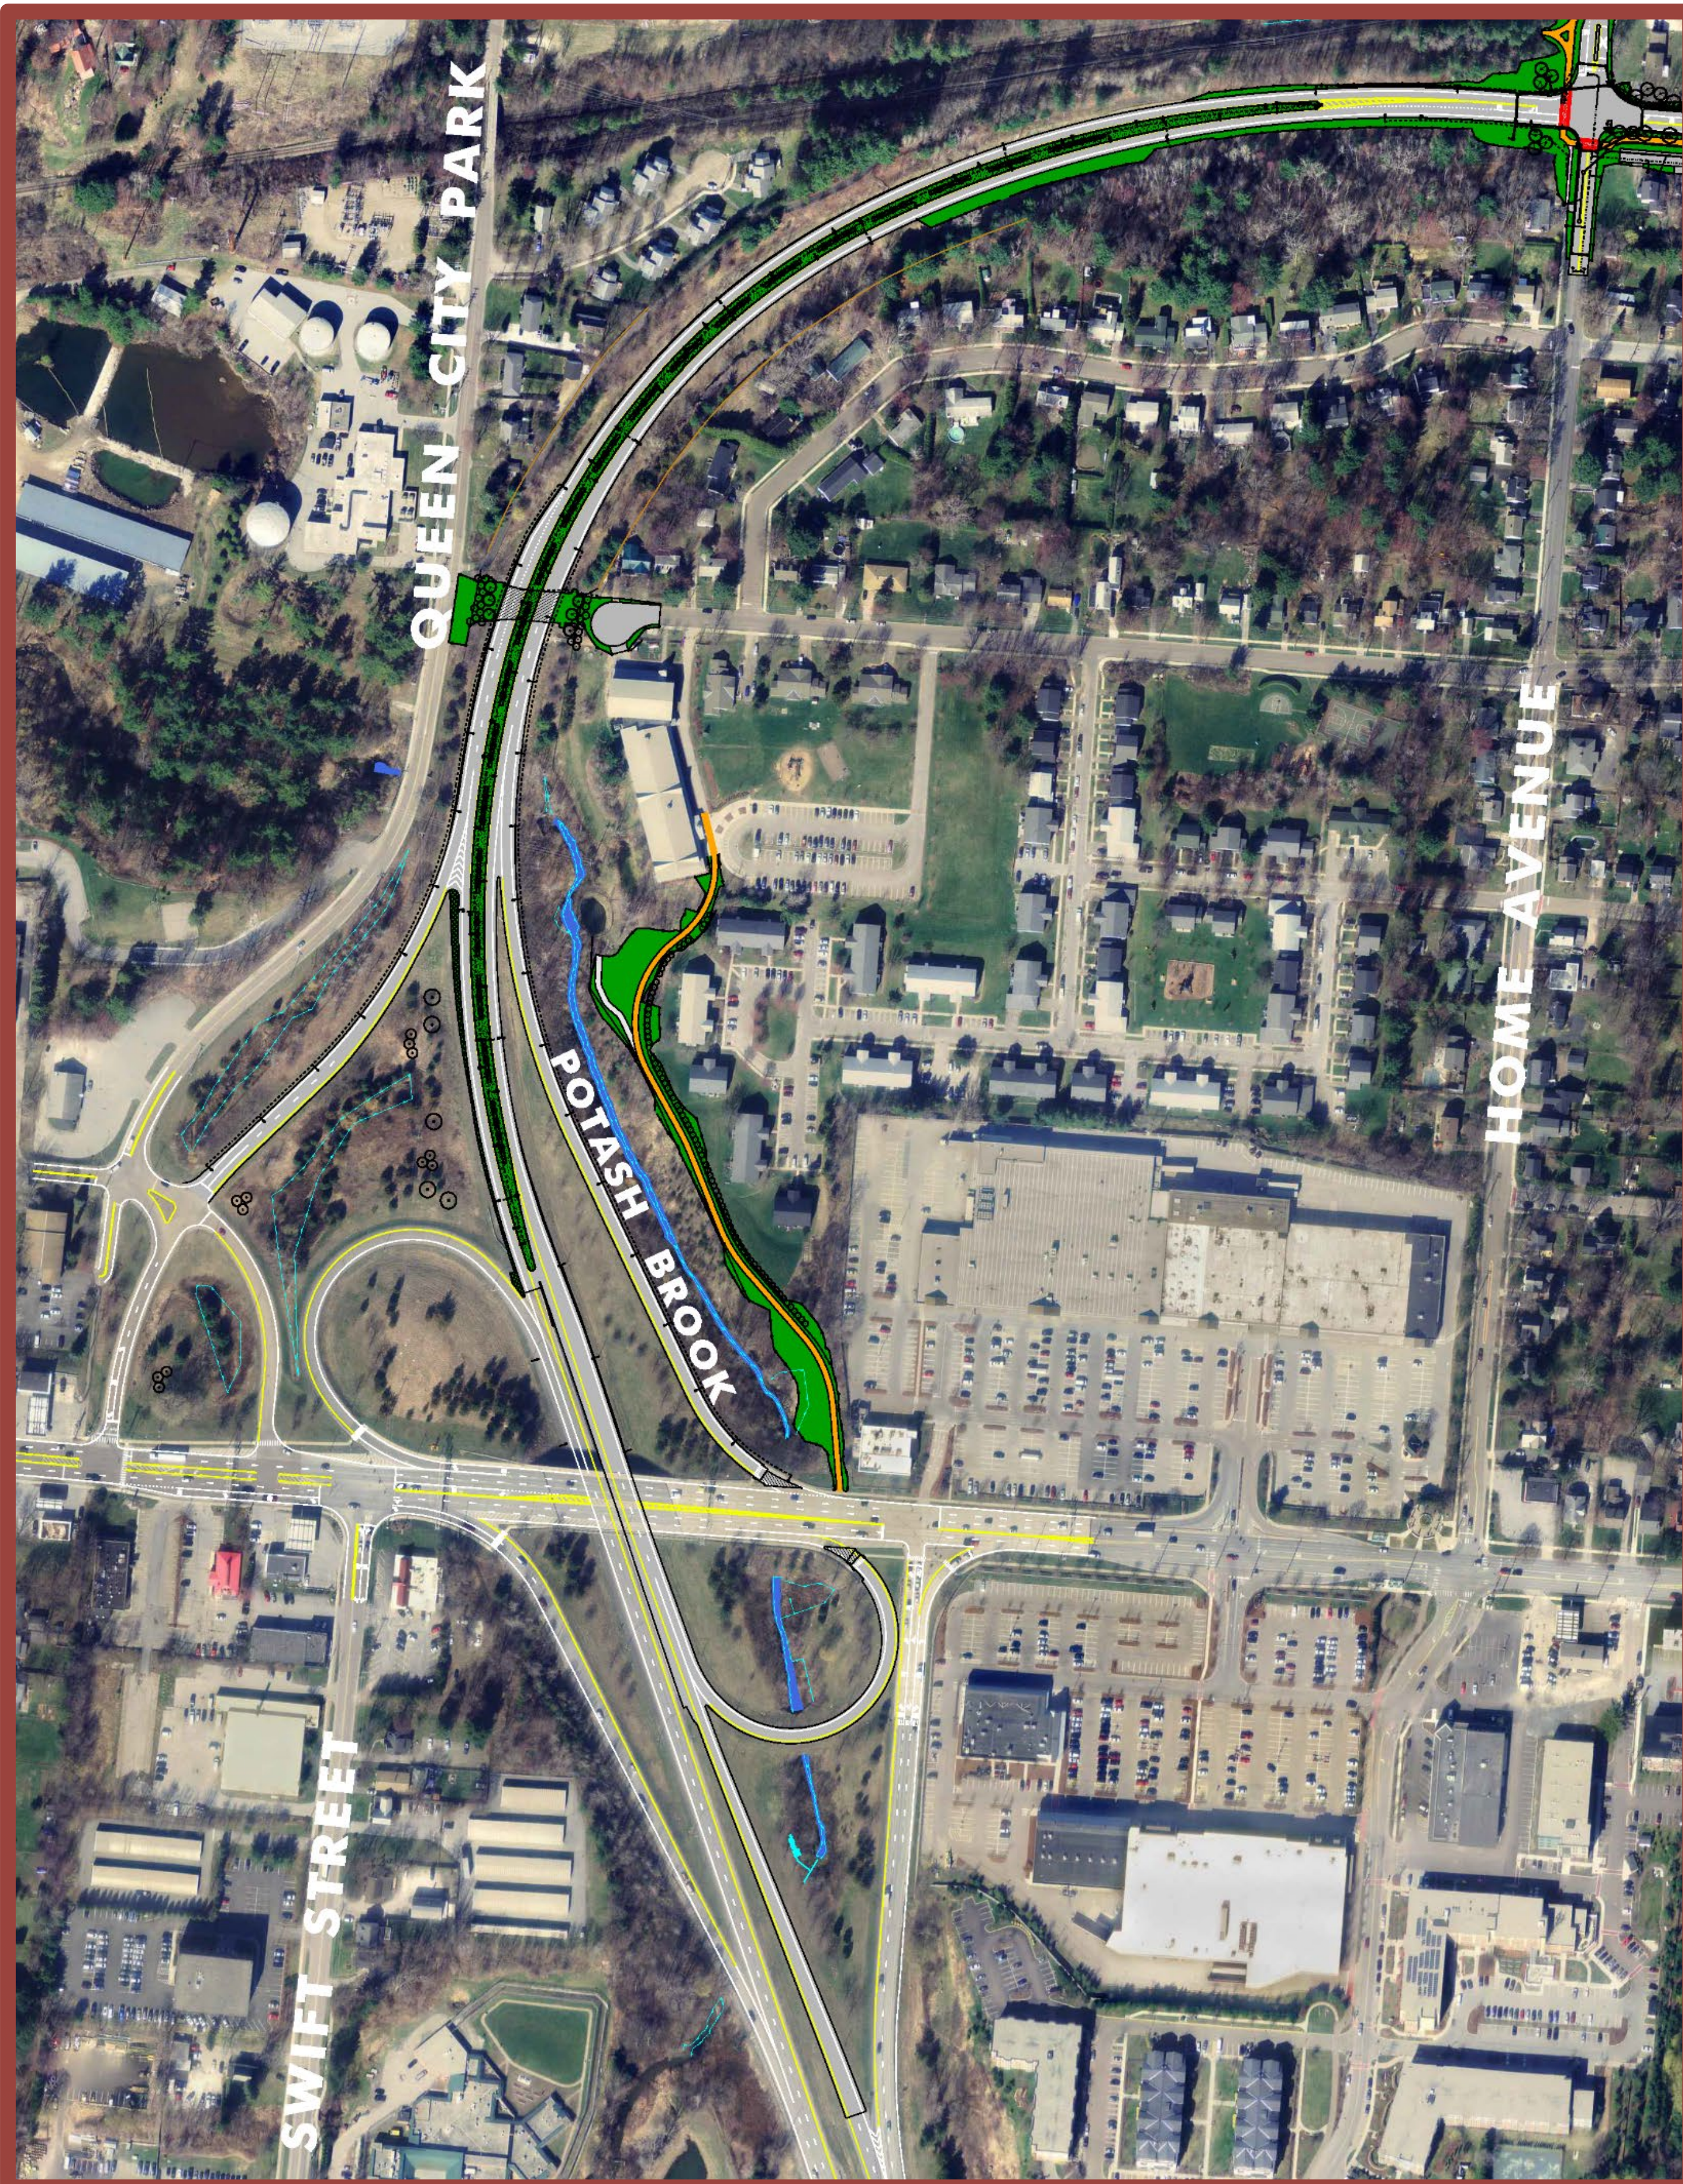

Construction Overview – Champlain Parkway

Construction Season 1 (2025)

- Winter work began in January
 - Crews have been working within the unused section of the previously constructed Southern Connector between Shelburne Street (Route 7) and Home Avenue
 - Work included clearing and grubbing, the installation of Erosion Protection and Sediment Control Devices, the removal of concrete barrier, the installation of stormwater drainage infrastructure and streetlight conduit and bases, and other items
- March through December 2025
 - Construction on the Champlain Parkway expands to include I-189 to Home Avenue and the ramp connections to the Champlain Parkway, I-189, and Route 7
 - Pine Street (south) between South Crest Drive and Queen City Park Road has permanently closed and the cul-de-sac is under construction

Construction Season 2 (2026)

- March through June 2026
 - Completion of the Champlain Parkway connection between I-189 and Home Avenue and the ramp connections and open to traffic

Construction Activities – Pine Street

- Rehabilitation of Pine Street (north) between Kilburn Street and Main Street
- Improvements to Pine Street include:
 - New granite curbs, pavement, line striping, roadway signage, and drainage upgrades
 - Bicycle and pedestrian accommodation improvements
 - New traffic signals at Maple and King Streets and upgrades to existing traffic signal at Main Street

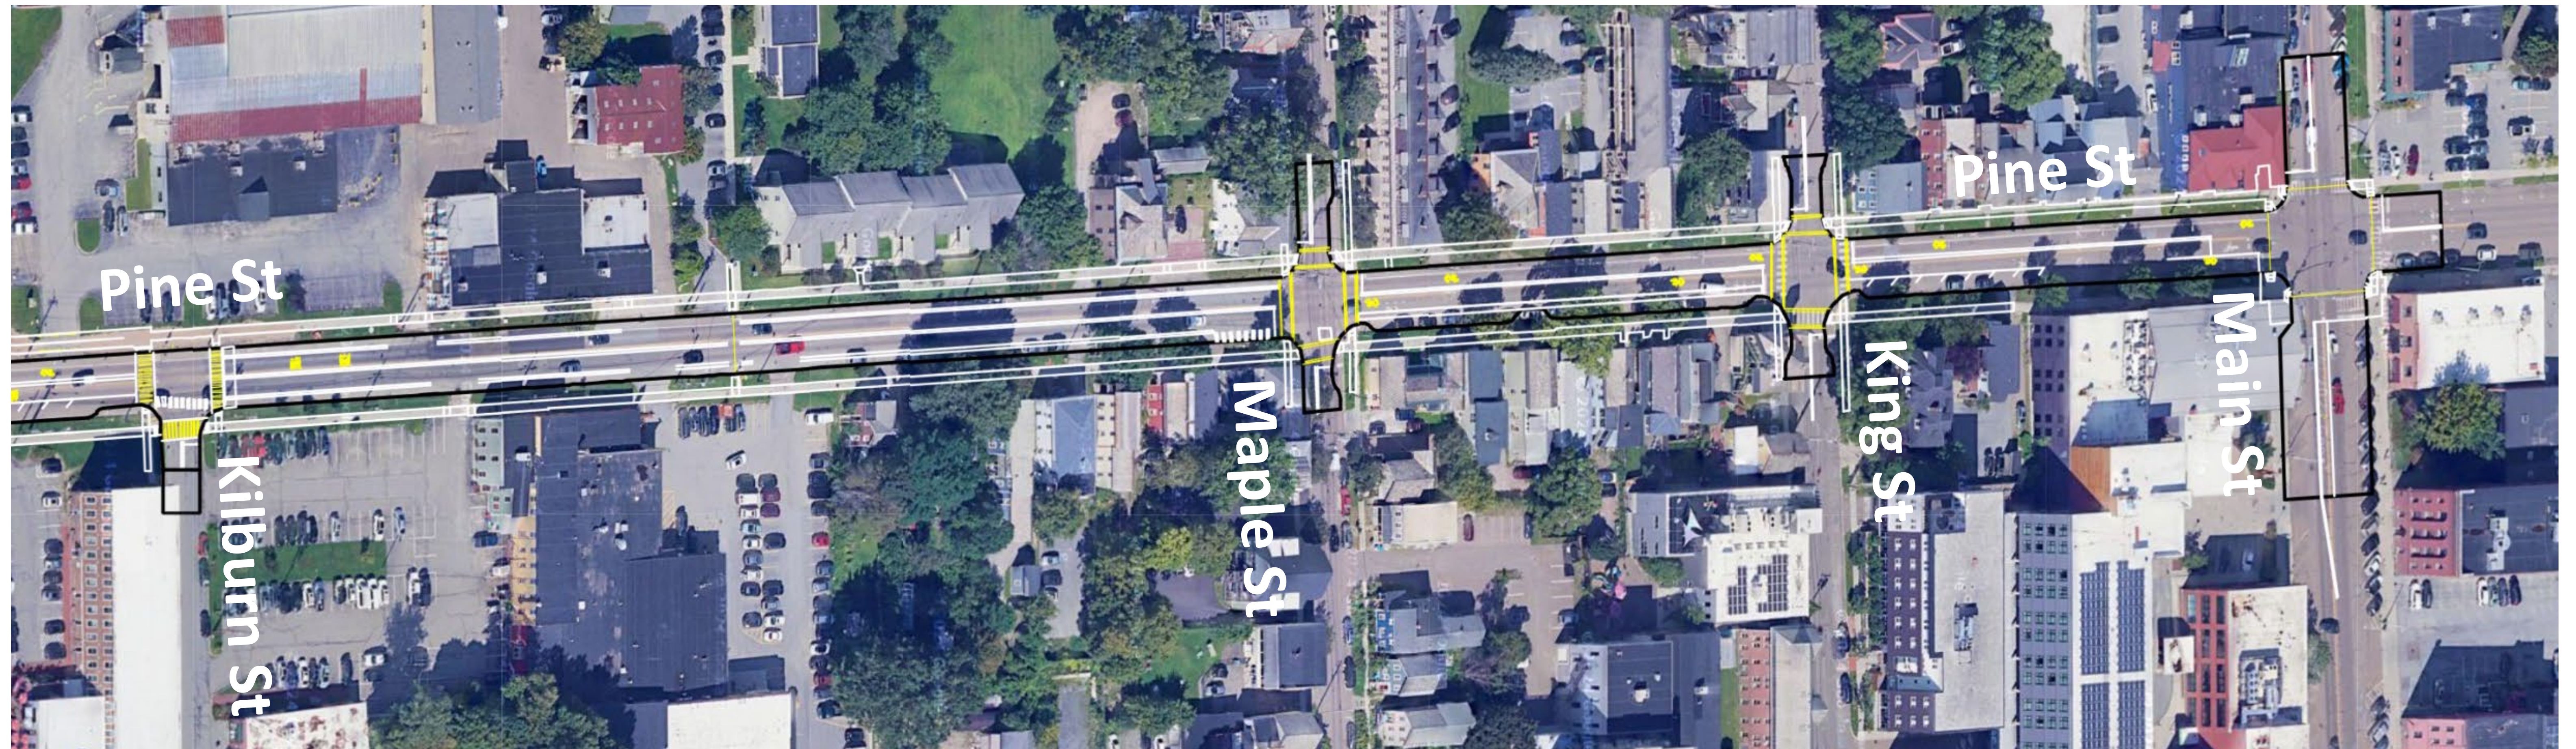

Construction Schedule – Pine Street

Construction Season 1 (2025)

- Construction activities on Pine Street to begin in April with major construction activities anticipated to be completed during the first construction season
 - Some finish work could extend into the final construction season (final paving, line striping, and landscaping)
- Construction hours will predominately be on weekdays (Monday through Friday) during the daytime hours (7am – 7pm); there may be instances of night or weekend work

Construction Impacts – Pine Street

- Work will be completed under one-lane closures and temporary road closures of block segments
- Some activities will require sidewalk closures with temporary pedestrian detours
- Some activities will require driveway restrictions and/or short closures
